BEFORE THE ASSIST

Who turned defence into attack?

away_12 is our leading candidate for the repeatable distribution link.

106 m

FORWARD PASS GAIN

Completed passes; positive gains

12

COMPLETED PASSES

Inside the measured transitions

8

FIRST-PASS RECEPTIONS

A recurring outlet after interventions

THE STRONGEST ALTERNATIVE

home_12: 79 m forward pass gain + 2 final-third entries delivered

away_12 leads distribution volume; home_12 supplies more direct territorial entries (0 vs 2).

---

138 candidate defensive starts → 63 with observed follow-up → 12 reaching an entry or shot

Evidence: 15-second event windows, stopped at turnovers/restarts; forward gain uses completed passes only.

Claim limited to distribution in this sample. Small samples and omitted carries prevent a confident overall MVP verdict.
